

Pricelist Winter Storage 2019-2020 (incl. VAT)

| | |
|---|-------------------------------------|
| A. Yachts in the hall Includes hauling out, pressure wash of the bottom, washing of the hull, barge rental and transportation to the hall | Price per m ² € 38.00 |
| B. Yachts on the shore Includes hauling out, pressure wash of the bottom, washing of the hull, barge rental and transportation to the parking place | € 21.55 |
| A + B Relaunching the ship in spring | € 4.60 |
| | Price per yacht |
| Slings are obligatory for yachts with a standing mast, these will only be applied by our Yachtservice & Refit department | € 53.00 |
| Environmental costs | € 13.75 |
| C. Berth in the water, permanent berth holders | - |
| | Price per m ² / per box |
| D. Berth in the water, passers-by | € 9.10 |
| The following activities will be carried out based on subsequent calculation: | |
| <ul style="list-style-type: none"> • Winterize and de-winterize the engine and sanitary • Un-stepping and stepping of the mast • Mast storage • Use mast crane • Take down and bend the sails • Refuel the tank • Transport during storage | |
| Various rates: | |
| • Navigate yacht to and/or from the crane | € 47.20 |
| • Drag yacht to and/or from the crane | € 55.40 |
| • Surcharge special barges heavy yachts | € 250.00 |
| • Battery maintenance during the winter period (price per battery, excluding removing and fitting the battery) | € 25.50 |
| • Battery maintenance on-board | |
| 1 to 3 batteries | € 100.00 |
| > 4 batteries | € 125.00 |
| • Electricity during the winter months incl. gauge rental (incl. 100KW-hr) | € 100.00 |
| • Use mast crane ≤ 20 meters | € 45.00 |
| • Use mast crane > 20 meters | € 75.00 |
| | Price per foot |
| • Polish and wax the hull | € 15.00 |
| • Polish and wax the superstructure | Price on request |
| • Antifouling < 45 foot | € 15.00 |
| ≥ 45 foot | € 16.00 |
| Motor yachts | € 18.00 |
| • Wash the sails, price per m ² | € 8.00 |
| • Summer storage winter cover | € 50.00 |
| • Storage sails, per sail | € 25.00 |
| • Winter storage outboard engine | € 50.00 |
| • Mast storage | price per meter € 9.50 |
| • Mast storage with radar | price per meter € 13.00 |
| • Storage gas bottles: 1 bottle | € 35.00 |
| 2 bottles | € 50.00 |

Regulations winter storage

(1/10 until 1/4: prologation by agreement)

Bottom of the ship

The bottom of all yachts will be pressure washed straight after hauling the yacht out of the water. This will prevent fouling, which is very difficult to remove later on.

Un-stepping and stepping of the mast and mast storage

The standard un-stepping and stepping of the mast means we will remove the boom and mast without sail, disconnect electric wiring, prepare the mast for transportation and stepping the mast the way it was removed before winter storage. Extra work can be filled out on the form.

Your registration for winter storage in the hall, implies that the mast will be stored in the mast storage. The boom will stay on board. To prevent damage to the mast it is not permitted to work on your mast in the mast storage. Should the mast remain on board, then we charge the overall length for the winter storage rate. The construction of the deck has to be suitable to carry the mast safely.

Barge

All yachts are placed on universal barges, which fit onto our hydraulic boat car. Special cradles will be used for heavy or long yachts.

Tarpaulins

We advise all yacht owners, who leave their yacht outside during the winter period, to put a tarpaulin over the yacht. You can order a fitted cover for your yacht with us, but we have to be informed about this early. We do not rent out tarpaulins. We do not permit covers of thin plastic foil, because experience has taught us that they will rip (due to wind) very easily.

Winter preparations for the engine and sanitary + battery maintenance

This includes: oil change of the engine, renew oil and fuel filters, preserve the engine and sanitary with antifreeze. All yachts in the hall must have their batteries disconnected. Heavy or hard to reach batteries will be left on board by us. Battery maintenance means periodical recharging of the batteries. We advise you to charge the batteries completely before the winter period. Should your yacht need new batteries, we offer them at competitive prices. When we prepare your yacht for sailing, we will reconnect all the systems and will check the V-belt. If necessary we will replace it. To prevent condensation we strongly advise you to fill your diesel tank before winter storage.

Standardized and other work

On the back side of the winter storage registration form we have reserved some space on which you can write down the work you want us to carry out. The place of your ship in the hall or outside will depend on the kind and amount of work that needs to be carried out. To ensure efficiency it is therefore very important that we know what work needs to be carried out before the yacht is hoisted out of the water. It is not allowed to leave gas bottles on board while your yacht is in our winter storage. You can store the bottles in our storage (see Various rates) or take them with you.
